How AI Can Help Law Graduates

By Mahesh Ramanujam, FCA · March 19, 2026 · promptedgrad.com/how-ai-helps-law-graduates/

Key Points

1

Legal research: AI can scan thousands of cases and statutes in seconds — use it to find precedents and summarise judgments.

2

Contract review: AI identifies standard clauses, flags unusual terms, and summarises lengthy agreements in plain English.

3

Drafting: AI produces first drafts of letters, notices, and agreements — lawyers refine, not create from scratch.

4

Client communication: AI helps translate complex legal language into plain English for client-facing documents.

5

Case preparation: AI can organise facts chronologically, identify gaps in arguments, and suggest counter-arguments.

6

Critical warning: AI cannot replace legal judgment. It hallucinates case citations. Always verify every case reference before filing.

Key Takeaway

AI handles the volume. The lawyer handles the judgment, the strategy, and the accountability.
